

SILENCIEUX UNIVERSEL / UNIVERSAL MUFFLERS

DIRECT FIT MUFFLERS / SILENCIEUX

ABOUT US:

Universal Mufflers Inc., is a Montreal based company.

Universal Muffler is the Authorized Canadian Distributor for EMSA Mofles.

EMSA Mofles is a Mexican manufacturer of high quality mufflers. Emsa's head office is located in the Estado de Nuevo León and was founded in 1984. Since then EMSA has become Mexican's biggest and most important manufacturer of mufflers and catalytic converters and the largest exporter in Latin America.

Our vast selection of mufflers are presently exported to, since 1990, United States, Australia, Puerto Rico, Costa Rica, Guatemala, El Salvador, Panama, Colombia and presently Canada. They are presently working to extend their presence in Argentina, Brazil and Chile.

All our mufflers are manufactured with raw materials imported from Germany, Japan and Korea. Our lineup is designed with a leak proof interior sealing system, aluminized steel body for a better performance, 14 gauge thickness, first quality nozzles tubes with exterior and interior welded at 300 degrees. Aluminized steel is steel that has been hot-dip coated on both sides with aluminum-silicon alloy. This process assures a tight metallurgical bond between the steel sheet and its aluminum coating, producing a material with a unique combination of properties possessed neither by steel nor by aluminum alone. Aluminized steel resists fire, heat, corrosion, and oxidation. All our mufflers have a double cover with a sound satisfaction guaranteed.

Our lineup of mufflers carry a full Limited Lifetime Warranty.
